

# WOMEN'S RIGHTS are under **attack** by MAGA Republicans

**Donald Trump proudly brags  
“I was able to kill Roe v. Wade”.**

**As a result:**

Half of states have now restricted or banned abortion; Many restrictions have the same effect as a ban. 1 out of 3 women have lost access.

Women with life-threatening pregnancy complications are being turned away from ER's. Maternal deaths are 2-4x higher for black women, and 62% higher for all women in states that restrict abortion.

Of the 64,000+ raped women and girls who have become pregnant in states that restrict or ban abortion, many have been forced to travel across state lines for care.

Doctors are leaving states that have criminalized abortion care, leaving half of all counties in the U.S. with no OBGYNs.

## What MAGA Republicans Say They Will Do Next:

- Restrict availability of birth control
- Ban or restrict IVF (In Vitro Fertilization)
- Limit interstate travel for pregnant women
- Pass a national abortion ban

Abortion is about Women's Rights, full stop.  
Where you live should not determine your  
basic human rights.
